Date of birth: 01/11/2003

NENSI MECALLA

Education:

- **Bachelor on Computer Science** *(October 2022 – June 2025)*
Faculty of Natural Sciences
- **Msc. Artificial Intelligence & Data Science** *(Current)*
Faculty of Natural Sciences

Training Courses:

- **The Complete 2024 Web Development Bootcamp** *(Jan 2024 – Oct 2024)*
Udemy (Remote)
 - React.js
 - RESTful APIs
 - jQuery
 - Git, Version Control
 - Security Handling
- **Full-Stack JAVA Developer Course** *(Jan 2025 – Oct 2025)*
The Software Development Academy
(Tirana, on-site)
 - Java (Core, OOP, Collections, Design Patterns)
 - Spring Framework (Spring Boot, Spring Data JPA, Spring Security, REST APIs)
 - Angular, Front-end technologies & frameworks
 - Database Management (MySQL, PostgreSQL, Hibernate/JPA)
 - Software Testing, Advanced Features

Experience:

- **Junior Salesforce Developer, QA Path** *(Sep 2025)*
Deloitte
(Tirana, on-site Internship)
 - Salesforce Configuration, Automation, Security
 - Test Case Design & Execution
 - Bug Tracking & Reporting (Jira)
- **Backend Developer Intern (Java/Spring Boot)** *(Aug 2025 – Sep 2025)*
JSolutions
(Tirana, on-site Internship)
 - Spring MVC
 - Spring Data JPA / MySQL
 - Spring Security (authentication)
 - JUnit (unit testing)

Portofoloi:

- **Inventory-Management-System a full-stack web application** using Java (Spring Boot) for the backend and Angular for the frontend, featuring secure user authentication with JWT, full Spring Security configuration, and robust validation for all API endpoints. Implemented RESTful services for seamless frontend–backend communication, integrated MySQL for persistent data storage, and designed a responsive, modular interface using Angular, TypeScript, HTML, and SCSS.

<https://github.com/Nensi2003/frontend-repo>

- **Java based console-application** that integrates with the AccuWeather API to provide weather forecast allowing users to retrieve information about locations (regions, countries, and cities) and get weather forecasts for specific cities over different time spans. The app is structured into **services, DAOs, DTOs, entities and POJO layers**.

<https://github.com/Nensi2003/Weather-Application/tree/main>

- **Online Blog full-stack web application** that allows admins and users to create, manage, and explore blog posts with an integrated admin panel. Built using **PHP, MySQL, HTML, CSS, and JavaScript**, the platform implements complete CRUD functionality. The system is designed to run on a local XAMPP server
